

FURNITURE SELECTIONS

We have good news, the furniture selections are usually the final and one of the most exciting steps in a project, so hang in there, you're almost at the finish line!

Firstly, we will review all design layouts on your provided plans. We comment on furniture placements, layouts and spacial planning.

We then start the furniture selection process, which begins by completing a document outlining all the pieces chosen.

Next, we begin visiting suppliers and retailers. We love setting up showroom appointments so that you can come along and view the items!

To conclude your furniture selections experience, we have an optional extra to hire us to complete the styling of all purchased items. Message our team for more information on this service!
