

YOUR HOME DESIGNS BEHIND THE DESIGN OUTDOOR ENTERTAINING

Driven by Zoe's design expertise and Tyson's affinity for concrete, Organica's outdoor spaces redefine modern living through enduring materials and thoughtful design. From the project's outset, Zoe's clear direction on the design and style of the outdoor entertaining areas was unmistakable. With a keen eye for detail and unwavering confidence, she guided the design process to ensure every element reflected her aesthetic sensibilities and functional priorities. Tyson complemented this vision with his skills on the tools and passion for concrete, enriching the project with durable and stylish outdoor features. Together, they created a harmonious balance of beauty and functionality that defines Organica's outdoor living spaces.

Concrete reigns supreme in Organica's outdoor spaces, reflecting Tyson's desire to favour durable, low-maintenance materials. Each feature embodies longevity and architectural elegance, from the Plungie pool with its concrete shell to the custom concrete staircase flowing seamlessly into an elevated pathway.

Sustainability meets style with Weathertex Cladding, chosen for its carbon-negative impact and local craftsmanship in heatherbrae. This eco-friendly choice enhances the exterior aesthetic and aligns perfectly with Organica's commitment to sustainable building practices. Custom elements like burnished concrete and hand-shaped limestone pavers add timeless charm and practicality. A custom concrete pizza base with GOZNEY oven creates a focal point for outdoor gatherings and is always a hit with guests.
