BEHIND THE DESIGN

LANDSCAPING

Landscaping and Organica's connection to the environment beyond the internal walls were extremely important in the planning stages. The brief for this component of the build was 'modern coastal', suitable to the Australian climate.

Zoe worked with Mon Palmer on the landscape design, which was crucial to get right. Mon assisted in selecting landscaping elements that suited the style and spaces, whilst Zoe guided the overall direction of the design to ensure that every outdoor element complemented the home's distinctive features, like the curved, limewash-rendered walls and the serene pool area. The main features include a hanging garden over the garage, seamlessly connecting the YHD studio with the lush outdoor environment. Existing XXX gum trees provide natural shade and privacy, enhancing the landscape's functionality while preserving its natural charm. Unique features like the striking Canary Palm at the entry, Zoyzia grass, and elegant brass exterior lights were added to blend aesthetics with practicality.
