

CONCEPT PLAN

Interiors

We'll start your journey with a meeting between you and the Designer to discuss your design goals and confirm a design brief.

Next, our Designer will head to your site to view the scope of works and take measurements.

We'll then put together a schematic floor plan, after reviewing your provided plans. We also offer design guidance during this step!

The final element of the concept plan stage includes 1 review with the Designer, in addition to your initial concept presentation.

Next up, our Interiors Concept & Vision package. Head to the next page to check out what this stage will look like for you. →
